FIBEX
True Speed. True Connection

COMPANY PROFILE

True Speed. True Connection.

Fibex Broadband Inc is an established Internet services that focuses on providing reliable and fast internet services. Providing internet services in San Fernando, Macabe, Apalit, Bitas, and Batasan. We provide these services through cutting-edge fiber lines keeping our customers connected.

Established in 2021

Currently serving over 3,024 Residents and Small Medium Enterprises.

Providing internet services to the Municipality of Macabebe and Masantol

Providing Internet services exclusively to 9 Universities in Pampanga.

Currently constructing lines in Azure North

Fibex Broadband Inc is a Corporation registered in the Philippines and has all the proper permits to operate in the province of Pampanga. Our system is secure so our customers can have a peace of mind. Fibex operates, designs, constructs, and maintains fiber lines accross Pampanga to provide superior and reliable service.

Mission

Our mission is to provide our customers with the highest quality, fast, and reliable internet services for both businesses and households. We aim to build and operate a strong, modern network that delivers secure, high-speed internet while continuously improving our technology and services.

We strive to create and cultivate long-term relationships with our customers, ensuring complete customer satisfaction.

Fibex will separate ourselves from our competition with innovative solutions to the existing shortcomings in the current industry.

True Connection. True Speed.

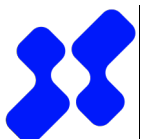

Vision

Our mission is to provide our customers with the highest quality, fast, and reliable internet services for both businesses and households. We aim to build and operate a strong, modern network that delivers secure, high-speed internet while continuously improving our technology and services.

We strive to create and cultivate long-term relationships with our customers, ensuring complete customer satisfaction.

Fibex will separate ourselves from our competition with innovative solutions to the existing shortcomings in the current industry.

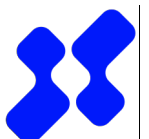

Story

Fibex began with a simple belief: that every Filipino deserves internet that's honest, reliable, and truly felt. In a world where connection is everything, work, school, family, and entertainment, too many are left frustrated by hidden fees, false promises, and endless runarounds.

From the start, Fibex set out to do things differently. No fine print. No exaggerated claims. Just clear plans, fair pricing, and customer care that actually shows up.

What began as a challenger brand quickly grew into a movement for fairness and transparency, empowering households, students, and business with internet they can finally trust. At the heart of Fibex is a belief that speed should be real, service should be human, and connection should bring people closer to each other, and to opportunity.

Services

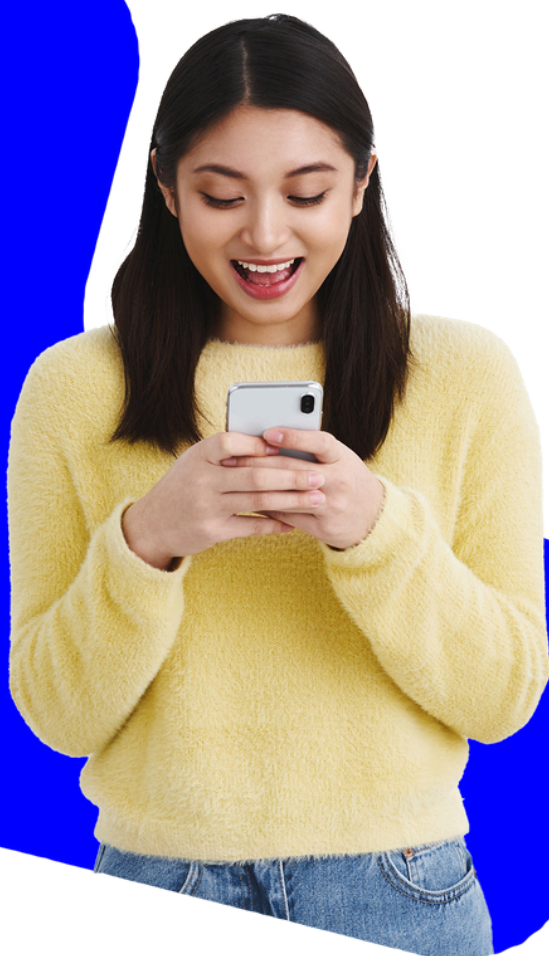

Fibex offers competitive and attractive packages for residential customers. We will provide dedicated fiber-optic internet connectivity throughout the subvision. We specialize in providing network reliability and performance.

Quality-Dedicated Network infrastructure with minimal congestion and symmetrical upload and download speeds.

Priority Support & Maintenance- Technical support with guaranteed quick response times and proactive monitoring to maintain a 99% uptime.

All our residential plans are unlimited, high-speed, and affordable. Whether streaming, social media, gaming, or even work-from-home setups, we are ready to provide reliable service.

Our system and design are built with the consumer in mind, we make sure all our Fiber lines are above industry standards.

**NO GIMMICKS.
NO FINE PRINT.
JUST INTERNET
THAT WORKS.**

**FAST TO INSTALL.
EASY TO MANAGE.
TRANSPARENT AT
EVERY STEP.**

True speed. True connection.

**Say goodbye to unstable internet,
hidden charges, and long lock-ins!**

Fibex delivers honest, consistent fiber speeds, fair pricing,
and real customer support — built for modern Filipino
homes, entrepreneurs, and communities.

Technology & Infrastructure

Network Reliability and Quality

Fibex invests in modern, high-quality network infrastructure to ensure stable, fast, and low-latency internet connections. The main difference is our network design; our Fibex lines are always below the standard capacity to ensure excess bandwidth for all our customers.

Fiber Optic Infrastructure

Fibex builds and maintains scalable fiber-optic networks that can support current needs and future growth, ensuring long-term service for homes, businesses, and institutions. We constantly upgrade our lines once we reach our threshold.

Redundancy and Resilience, The network is designed with backup routes, failover systems, and projection measures to minimize downtime and quickly restore service during outages, disasters, or accidents.

Network Monitoring and Maintenance

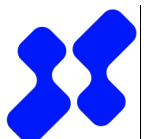

We have technicians scheduled 7 days a week to address any issues that may arise. We use 24/7 monitoring systems to detect issues early and deploy maintenance teams promptly, reducing service interruptions.

Scalable and Future-Ready Design

Infrastructure is planned to be upgrade-ready, allowing faster speeds, new technologies, and additional customers without major disruptions.

Local Deployment and Support

Fibex prioritizes local infrastructure development, enabling faster installations, quicker repairs, and stronger community presence. We have multiple offices in a city instead of one large office to ensure prompt response to issues that may arise.

Social Responsibility

Bridge the Digital Divide

Fibex is responsible for providing reliable and affordable internet access, especially to underserved and rural communities, so more people can access education, jobs, government services, and information. Fibex currently supplies two municipalities in the province of Pampanga, offering dedicated lines ensuring safety and reliable service for the government.

Support Education and Youth

Fibex currently supplies 9 universities in Pampanga. Our plan is to help schools, students, and learners by offering stable connections, special community or school plans, and supporting digital initiatives.

Empower Local Communities

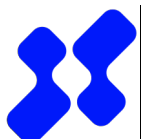

By enabling small businesses, work-from-home opportunities, and online services, Fibex helps boost local economies and improve the quality of life. Fibex currently supports hundreds of businesses with stable connections because we understand the pain points of each entrepreneur.

Provide Honest and Reliable Service

Social responsibility includes transparent pricing, fair policies, responsive customer support, and quick action during outages or disasters.

Community Involvement and Care

Fibex participates in community programs, disaster response, and local initiatives, showing that it is not just a provider but a partner of the community. We plan on being involved in every community where our customers reside.

Target Market And Customers

Residential Households

Fibex currently primarily services families and individuals who need reliable and affordable internet for daily use such as streaming, online classes, remote work, communication, and online services.

Small and Medium Enterprises (SMEs)

Local businesses such as sari-sari stores, offices, clinics, cafes, and services providers rely on Fibex for stable connectivity to support operations, digital payments, online marketing, and customer communication.

Home-Based and Remote Workers

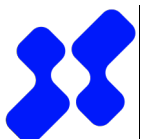

Freelancers, online workers, and remote employees who depend on consistent and high-speed internet for productivity, video calls, and cloud-based tools.

Educational Institutions and students

Schools, training centers, and students who require dependable internet access for learning platforms, research, and digital classrooms.

Local Government Units and Community Facilities

Barangay halls, Municipals, health centers, and community facilities that need internet for public services, communication, and data management.

Future Plans And Growth

Network Expansion

Fibex plans to gradually expand its fiber-optic network to reach more barangays and nearby communities, prioritising underserved and high-demand areas.

Service Improvement and Speed Upgrades

Continuous upgrades to infrastructure will allow Fibex to continue to offer higher speeds, better stability, and improved latency as customer needs grow.

Increased Reliability and Redundancy

Fibex will invest in backup sources and lines, improved routing, and disaster-resilient infrastructure to minimise downtime and ensure consistent services.

Customer Experience Enhancement

Future plans include improving customer support systems, faster response times, and more efficient installation and repair processes.

Affordable and Flexible Services Plans

Fibex aims to introduce more flexible and budget-friendly plans, options, including cummity packages, small-business plans, and tailored solutions.

Technology and System Modernisation

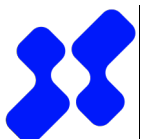

Implementation of improved network monitoring, billing systems, and automation tools to support efficient operations and scalable growth.

Partnerships and Community Collaboration

Fibex plans to collaborate with local governments, schools, housing developers, and businesses to extend connectivity and support community development.

Sustainable and Responsible Growth

Growth will be guided by long-term sustainability, ensuring that expansion does not compromise service quality, safety, or community trust.

We love our customers, so feel free to visit during normal business hours.
